Thinking up a quality pimp name is a difficult endeavor. If you're at a loss for ideas, you should check this out... I guess this needs to wrap to the next line?

This is the Pimp Handle Generator which can be quite handy if you are in dire need of a pimp name with the quickness. If you don't like the name it gives you, try a couple variations of your name. For example, your initials, first and middle name, middle and last name, last name then first name. There are a lot of options, so keep trying till you get one that doesn't suck.
