BLING wasn't getting a great deal of play with it's cs_ map rotation and there was a good deal of demand for an FPN fun maps server so we decided to change things up and put some custom maps on. BLING now rotates between the following maps: fy_snow, aim_ak_colt, scoutznivez, fy_iceworld2k, awp_map. As an additional note, scoutznivez is low gravity (sv_gravity 250). Enjoy!
